

DISRonline

Search &

Profiling Briefing

2004-09-28

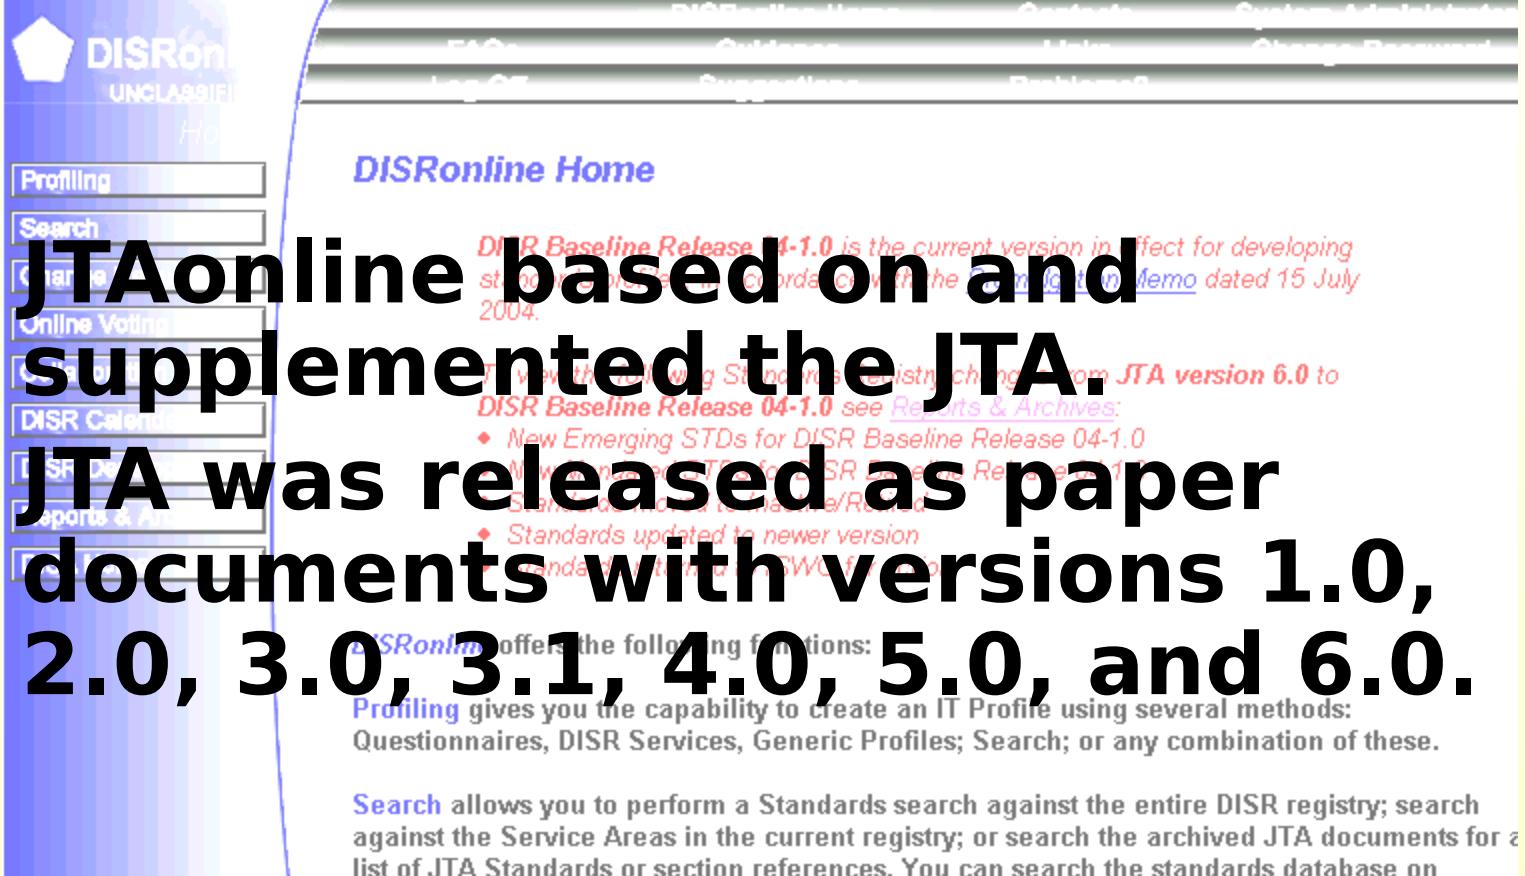

Agenda

- Short history on DISRonline.
- Paperless philosophy.
- Demonstration.
 - Profiling.
 - Search.
 - Compare Profiles.

DISRonline History

The image shows a screenshot of the DISRonline Home page. The page has a blue header with the DISRonline logo and "UNCLASSIFIED" status. The main content area is white with blue text. It features a large heading "DISRonline Home" and a red note: "DISR Baseline Release 04-1.0 is the current version in effect for developing standard policies in accordance with the [Transition Memo](#) dated 15 July 2004." Below this, there is a list of links: "View the following Standards Registry, changing from JTA version 6.0 to DISR Baseline Release 04-1.0 see [Reports & Archives](#):" followed by a bulleted list: "New Emerging STDs for DISR Baseline Release 04-1.0", "New Emerging STDs for DISR Baseline Release 04-1.0", "Standards updated to newer version", and "Standards updated to newer version". At the bottom, it says "DISRonline offers the following functions: Profiling gives you the capability to create an IT Profile using several methods: Questionnaires, DISR Services, Generic Profiles; Search; or any combination of these. Search allows you to perform a Standards search against the entire DISR registry; search against the Service Areas in the current registry; or search the archived JTA documents for a list of JTA Standards or section references. You can search the standards database on".

- JTAonline based on and supplemented the JTA.
- JTA was released as paper documents with versions 1.0, 2.0, 3.0, 3.1, 4.0, 5.0, and 6.0.

Paperless Philosophy

- **DISRonline shifts away from paper based JTA.**
- **Standards are now 'Date Based' not 'Version Based'.**
 - **References to versions have been removed from DISRonline.**

Demonstration

• Profiling

- Generic Profile
- Questionnaire
- Service Areas
- View / Modify
- Search

A screenshot of the DISRonline interface for the Profiling module. The top header reads "DISRonline UNCLASSIFIED Profiling". The left sidebar has buttons for "Profiling", "Generic Profile", "Questionnaire", "Service Areas", "View / Modify", "Search", "Change Request", "Online Voting", and "Collaboration". The main content area is titled "Profiling Methods" with the following text:

A System Profile, is a collection of data and information that describes a system. A Profile contains one or more profiles. The iterative process; most systems use several of these methods to create a system profile. [Quick Start Guide](#)

• Search

- Registry
- Service Areas
- JTA Documents

A screenshot of the DISRonline interface for the Search module. The top header reads "DISRonline UNCLASSIFIED Search". The left sidebar has buttons for "Profiling", "Search", "Registry", "Service Areas", "JTA Documents", "Change Request", "Online Voting", "Collaboration", "DISR Calendar", and "DISR Development". The main content area is titled "Searching Methods" with the following text:

There are three search methods: the cited standards and, the JTA documents, and the JTA documents. [Quick Start Guide](#)

1. [Search Registry](#) – Search the Registry.
2. [Search Service Areas](#) – Search the Service Areas registry.
3. [Search Archived JTA Documents](#) – Search the Archived JTA documents.

Comparing Profiles

- **Can compare any profile against another.**
- **System Profiles to IT Profiles comparisons are valid.**
- **Up to 6 profiles at a time can be compared.**
- **SIPRnet only.**

Demonstration

• Compare
